A Guide for Galileo® K-12 Online:
## Admin Dashboard: Benchmark Performance Levels

PURPOSE

The *Benchmark Performance Levels* widget summarizes multiple measures of student performance for the entire district or selected school(s) at once.   A bar chart illustrates the percent and count of students in each Performance Level. Additionally displayed, is the student count, average percent correct, average Developmental Level (DL) score, and the average percent of standards mastered. A user may click on the site name and drill down to disaggregated data. At any level a user may also click the *View Full Detailed Benchmark Performance Levels Widget Report* link.

GENERATE REPORT

1. Click the **Dashboard** icon.
2. In the *Dashboard* widget, hover over the **Dashboard** menu and select **Admin Dashboard**.

3. In the *Dashboard* widget, select the **School** or **All Schools**.
4. On the *Benchmark Performance Levels* widget, select the **test.** The tests are grouped by grade and subject.

5. Displayed are bar graphs, the DL range for each performance level, and a data table.

REPORT INTERPRETATION

a.   *Print* and *help file* access.

b.   Selected *test*.

c.   Displays a breakdown of percentage of students for each performance level. Hover the mouse over a portion of the bar chart to display the *performance level, student count*, and *percentage of students* in that level.

d.   Hover your mouse over the *district, school and/or class name* to display *the total student count represented in the chart, average % correct, average DL (developmental level scale score), average % of standards mastered*, and *% passing*.

e.   The *DL range* for each performance level displays below the bar charts.

f. A table with the:
    i. **Student Count**: Number of students at the selected site who have scores for the selected test. This count includes students who may not have answered all test items.
    ii. **Avg % Correct**: This percentage is based on the raw score (total points student earned/total test points).
    iii. **Avg DL**: Average DL score for the student count.
    iv. **Avg % Standards Mastered**: The average percentage of students who have demonstrated mastery. The mastery is based on what the district/charter school has identified as a "mastery" as shown on the Intervention Alert report.

View Full Detailed Benchmark Performance Levels- initially shows detailed information for the district [All Schools] and/or the selected school/class. However users may act upon the data by adding tests, adding/removing schools and classes (depending on user-level), and regrouping the data by school/class and test. Data may be the disaggregated further utilizing the school (if drilling down from the district view), class and student links.

Click the school or class name to drill down to disaggregated data.
