A Guide for Galileo® K-12 Online: Class Score Grid and Class Score List Reports

PURPOSE

These reports provide teachers with data related to how each individual student performed on the test and how the overall class performed on the benchmark or formative test.

CLASS SCORE GRID

This report highlights the highest score in the class, the lowest score in the class, and class average. It also shows each individual student's test score presented as percent correct in addition to being presented as total points earned. You may also use this report to find out specific information

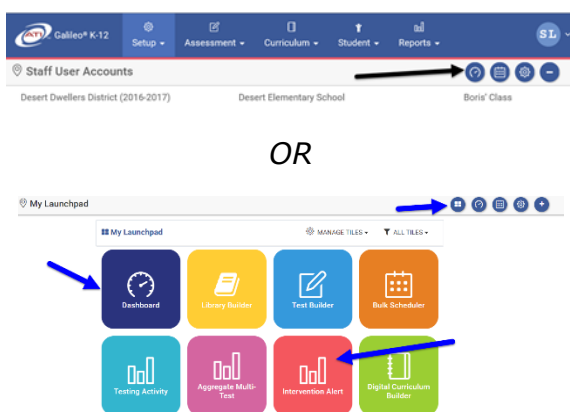

related to test items. You will see the total possible points listed for each test item and for the test on the whole. You may also view the average percent correct per test item, and the total points earned by each student.

CLASS SCORE LIST

This report will list all the students in a selected class, their identification number, the student's total points earned and their grade as a percentage. Additionally, it will tell you the average class score and the total points possible.

GENERATE

1. Click the **Dashboard** icon or tile.

1. Click **Reports>Test Scores>Class Test Scores**.

2. From the *Dashboard* widget, **Dashboard** dropdown menu select **Teacher Dashboard**.

3. From the *Teacher Dashboard* widget, select either the **Class** or the **Intervention Group** radio button.

- a. If selected the **Class** radio button:
 - i. Use the **School** drop-down menu to select the school if you are a District- or School-level user or a user with access to multiple schools,
 - ii. Verify the **Class**.
 - b. If selected the **Intervention Group** radio button, select the **Intervention Group Library** and the **Intervention Group**.
4. Select the **Reports** view of the **Teacher Dashboard**.

5. Under **Recent Events**, if **Class Test Scores** is set as a [Favorite Report](#) click the link or click on **Favorite Reports** and then click on the Class Test Scores link.

2. If you are a District- or School-level user with access to more than one school, select the **School**.

3. Select the **Class**.

4. Select the test **Library**.

5. Double click on the **Test**.

6. The Class Test Scores will generate.
