

ATI and Key Data Systems: A Partnership that Meets all Your Assessment Needs

The partnership of ATI and Key Data Systems (KDS) provides Galileo® K-12 Online users access to one of the largest item banks in the nation, offers comprehensive assessment options, and provides extensive reporting capabilities. All of these features are readily accessible directly through Galileo providing convenient access to a cost-effective solution for all district and charter assessment needs.

The partnership offers a vast collection of high-quality, standard-aligned items. The collection includes the ATI item bank containing over 150,000 items aligned to college and career ready and local state standards in K-12 math, ELA, and science. Plus, districts and charters choosing to participate in the ATI *Community Assessment Item Banking (CAIB)** initiative have access to additional items in non-state tested subjects (e.g. PE, foreign language, and the arts). The collection also features the KDS Inspect® item bank containing over 37,000 items written to rigorous college and career readiness standards in math and ELA as well as items supporting assessment in science and history. The Galileo and Inspect item banks offer a comprehensive array of technology enhanced (TE) items designed to elicit higher-order thinking, similar to that found on state-wide tests.

Districts and charters benefit from expansive choices that provide a best fit for all of their formative and district/charter-wide assessment needs. Galileo pre-built and custom assessment options include benchmarks, formatives, classroom checkpoint tests, screening and placement tests, interim and final-course examinations, pretests and posttests, technology enhanced early literacy and math assessment series, computerized adaptive tests, instructional effectiveness assessments, and customized tests aligned to district curriculum and pacing calendars. Inspect items may be included on any formative assessment developed in Galileo. Plus, Galileo users can access the Inspect assessment suite including over 300 pre-built formative assessments designed to prepare students for end-of-year, high-stakes exams.

Users can obtain actionable, real-time data on student learning with Galileo reports. Reliable and valid assessment results from an array of assessments administered in Galileo are rapidly available to teachers, administrators, specialists, and parents. Reports in the system detail student mastery of standards, next steps in instructional-decision making to promote learning coupled with continuous tracking of student progress, and forecasting of student performance throughout the year.
